

Benign Conditions

What is the primary condition?

- Aneurysmal Bone Cyst
- Angiofibroma of Nasopharynx (Juvenile Nasopharyngeal Angiofibroma)
- Castleman's Disease
- Desmoid Tumor
- Dupuytren's Contracture
- Extramedullary Hematopoiesis
- Giant Cell Tumor of Bone (Osteoclastoma)
- Graves' Ophthalmopathy
- Gynecomastia
- Hemangiomas
- Heterotopic Ossification
- Keloid Scar
- Langerhans Cell Histiocytosis (Eosinophilic Granuloma)
- Lethal Midline Granuloma (Stewards Disease)
- Lymphangiomas
- Neurofibromas (Benign, von Recklinhausen)
- Orbital Myositis
- Orbital Pseudotumor
- Paraganglioma
- Plantar Fasciitis
- Rosai Dorfman Disease
- Other

Has the patient previously received radiation therapy to the same or an immediately adjacent area?

- Yes
- No
- Unknown

Breast Cancer

Which side is the breast cancer on?

- Left side
- Right side
- Bilateral

What is the intent of therapy?

- Adjuvant/Post-Operative
- Palliative (non-curative) or Other

Has the patient had surgery, and if so, what type?

- Patient has not had surgery
- Mastectomy
- Lumpectomy

What is the T (Tumor) stage?

- Tis (in Situ)
- T1
- T2
- T3
- T4
- Tx/Unknown

What is the N (Node) stage?

- N0 (cancer has not spread to lymph nodes)
- N1mic
- N1
- N2
- N3
- Nx/Unknown

What is the M (Metastasis) stage?

- M0
- M1
- Mx/Unknown

(Continued on next page)

Based on the latest clinical records, does the patient have distant metastatic disease (e.g. cancer has spread to the brain, lung, liver, bone and/or other site)?

- Yes
- No
- Unknown/Not Applicable

What is the treatment site?

- Chest Wall
- Chest Wall + Supraclavicular nodes
- Chest Wall + Supraclavicular nodes + Internal mammary nodes
- Whole Breast
- Whole Breast + Supraclavicular nodes
- Whole Breast + Supraclavicular nodes + Internal mammary nodes
- Partial Breast

Has the patient previously received radiation therapy to the same or an immediately adjacent area?

- Yes
- No
- Unknown

Does the patient have a connective tissue disorder, such as lupus or scleroderma?

- Yes
- No
- Unknown/Not Applicable

Central Nervous System (CNS) Tumors

Select the cancer/tumor type:

- Glioma
- Acoustic Neuroma
- Arteriovenous Malformations (AVMs)
- Craniopharyngioma
- Glomus Jugulare Tumor
- Meningiomas
- Pituitary Adenoma
- Uveal Melanoma
- Pineal Gland Tumor
- Hemangiomas
- Trigeminal Neuralgia
- Spinal Cord Tumors
- Ependymoma
- Medulloblastoma

Based on the latest clinical records, does the patient have distant metastatic disease (e.g. cancer has spread to the brain, lung, liver, bone and/or other site)?

- Yes
- No
- Unknown/Not Applicable

What is the intent of therapy?

- Pre/Post-Operative (curative with surgery)
- Definitive (curative without surgery)
- Palliative (non-curative) or Other

Is the patient's trigeminal neuralgia refractory to medical therapy (i.e. not responding to conventional drug therapy)? Note: If the patient does **not** have trigeminal neuralgia, please select Unknown/Not Applicable.

- Yes
- No
- Unknown/Not Applicable

(Continued on next page)

Has the patient previously received radiation therapy to the same or an immediately adjacent area?

- Yes
- No
- Unknown

Colorectal Cancers (Including Anal)

What is the primary cancer type?

- Anal
- Rectal
- Colon

What is the T (Tumor) stage?

- T1
- T2
- T3
- T4
- Tx/Unknown

What is the N (Node) stage?

- N0 (cancer has not spread to lymph nodes)
- N1
- N2
- N3
- Nx/Unknown

What is the M (Metastasis) stage?

- M0
- M1
- Mx/Unknown

Based on the latest clinical records, does the patient have distant metastatic disease (e.g. cancer has spread to the brain, lung, liver, bone and/or other site)?

- Yes
- No
- Unknown/Not Applicable

What is the intent of therapy?

- Pre/Post-Operative (curative with surgery)
- Definitive (curative without surgery)
- Palliative (non-curative) or Other

(Continued on next page)

Has the patient previously received radiation therapy to the same or an immediately adjacent area?

- Yes
- No
- Unknown

Genitourinary Cancers

What is the primary cancer type?

- Adrenal Gland
- Kidney
- Ureter
- Bladder
- Urethra
- Penis
- Testicle

What is the T (Tumor) stage?

- T1
- T2
- T3
- T4
- Tx/Unknown

What is the N (Node) stage?

- N0 (cancer has not spread to lymph nodes)
- N1
- N2
- N3
- Nx/Unknown

What is the M (Metastasis) stage?

- M0
- M1
- Mx/Unknown

Based on the latest clinical records, does the patient have distant metastatic disease (e.g. cancer has spread to the brain, lung, liver, bone and/or other site)?

- Yes
- No
- Unknown/Not Applicable

(Continued on next page)

What is the intent of therapy?

- Pre/Post-Operative (curative with surgery)
- Definitive (curative without surgery)
- Palliative (non-curative) or Other

Has the patient previously received radiation therapy to the same or an immediately adjacent area?

- Yes
- No
- Unknown

Gynecologic Cancers (Including Endometrium)

What is the primary cancer site?

- Uterus
- Cervix
- Vulva
- Vagina
- Ovary/Fallopian Tube

What is the uterine cancer type? Note: If the patient does **not** have uterine cancer, please select

N/A.

- Endometrial Carcinoma
- Carcinosarcoma
- Sarcoma
- Uterine cancer: Other
- N/A

What is the T (Tumor) stage?

- T1
- T2
- T3
- T4
- Tx/Unknown

What is the N (Node) stage?

- N0 (cancer has not spread to lymph nodes)
- N1
- N2
- N3
- Nx/Unknown

What is the M (Metastasis) stage?

- M0
- M1
- Mx/Unknown

(Continued on next page)

Based on the latest clinical records, does the patient have distant metastatic disease (e.g. cancer has spread to the brain, lung, liver, bone and/or other site)?

- Yes
- No
- Unknown/Not Applicable

What is the patient's TNM group stage or FIGO stage?

- I
- II
- III
- IVA
- IVB
- Unknown/Not Applicable

What is the intent of therapy?

- Pre/Post-Operative (curative with surgery)
- Definitive (curative without surgery)
- Palliative (non-curative) or Other

Has the patient previously received radiation therapy to the same or an immediately adjacent area?

- Yes
- No
- Unknown

Head and Neck Cancers

What is the head and neck site being treated?

- Oral Cavity (lip, buccal mucosa, alveolar ridge, retromolar trigone, floor of mouth, hard palate, oral tongue, other)
- Oropharynx (base of tongue, tonsil, soft palate, pharyngeal wall, other)
- Nasopharynx
- Hypopharynx
- Larynx (supraglottis, glottis, subglottis)
- Salivary Gland Tumors
- Nasal Cavity
- Para-Nasal Sinus
- Skull base: Chondrosarcoma or Chordoma
- Skull base: Other
- Thyroid
- Unknown Primary of Head and Neck

What is the T (Tumor) stage?

- Tis (in situ)
- T1
- T2
- T3
- T4
- Tx/Unknown

What is the N (Node) stage?

- N0 (cancer has not spread to lymph nodes)
- N1
- N2
- N3
- Nx/Unknown

What is the M (Metastasis) stage?

- M0
- M1
- Mx/Unknown

(Continued on next page)

Radiation Oncology Clinical Worksheets

Based on the latest clinical records, does the patient have distant metastatic disease (e.g. cancer has spread to the brain, lung, liver, bone and/or other site)?

- Yes
- No
- Unknown/Not Applicable

What is the intent of therapy?

- Pre/Post-Operative (curative with surgery)
- Definitive (curative without surgery)
- Palliative (non-curative) or Other

Has the patient previously received radiation therapy to the same or an immediately adjacent area?

- Yes
- No
- Unknown

Lung Cancer

What is the lung cancer type?

- Non-Small Cell Carcinoma
- Small Cell
- Carcinoid Tumor

Has a biopsy been done?

- Yes
- No

What is the T (Tumor) stage?

- T1
- T2
- T3
- T4
- Tx/Unknown

What is the N (Node) stage?

- N0 (cancer has not spread to lymph nodes)
- N1
- N2
- N3
- Nx/Unknown

What is the M (Metastasis) stage?

- M0
- M1
- Mx/Unknown

Based on the latest clinical records, does the patient have distant metastatic disease (e.g. cancer has spread to the brain, lung, liver, bone and/or other site)?

- Yes
- No
- Unknown/Not Applicable

(Continued on next page)

What is the cancer stage?

- I
- IIA
- IIB
- III
- IV
- Limited
- Extensive
- Unknown

What is the intent of therapy?

- Pre/Post-Operative (curative with surgery)
- Definitive (curative without surgery)
- Palliative (non-curative) or Other

Is the patient a surgical candidate?

- Yes
- No
- N/A

Has the patient refused surgery?

- Yes
- No
- N/A

What is the tumor size?

- ≤ 5 cm
- > 5 cm
- N/A

Has the patient previously received radiation therapy to the same or an immediately adjacent area?

- Yes
- No
- Unknown

Leukemia, Lymphoma, Multiple Myeloma, Plasmacytoma Cancers

What is the type of cancer?

- Lymphoma
- Plasmacytoma (Solitary)
- Multiple Myeloma
- Leukemia

What is the type of Lymphoma? Note: If the patient does **not** have lymphoma, please select N/A.

- Hodgkin's Lymphoma
- Non-Hodgkin's Lymphoma: Diffuse Large B-Cell
- Non-Hodgkin's Lymphoma: Follicular
- Non-Hodgkin's Lymphoma: Mantle Cell
- Non-Hodgkin's Lymphoma: MALT Lymphoma
- Cutaneous Lymphoma
- Lymphoma: Other
- N/A

What is the Lymphoma stage? Note: If the patient does **not** have lymphoma, please select N/A.

- I
- II
- III
- IV
- N/A

What is the intent of therapy?

- Post-Chemotherapy (curative after chemotherapy)
- Definitive (curative without chemotherapy)
- Palliative (non-curative) or Other

(Continued on next page)

What is the treatment site?

- Mediastinum
- Head and Neck
- Central Nervous System
- Total Body Irradiation
- Other

What is the head & neck treatment site? Note: If the treatment site selected is **not** head & neck, please select N/A.

- Pharynx (nasopharynx, oropharynx, and hypopharynx)
- Larynx
- Paranasal sinus
- Nasal cavity
- Oral cavity
- Salivary gland
- Neck
- Other head and neck site
- N/A

Has the patient previously received radiation therapy to the same or an immediately adjacent area?

- Yes
- No
- Unknown

“Other” Cancer or Condition

Please input the primary cancer or condition type: _____ (Free Text Field) _____

What is the intent of therapy?

- Pre/Post-Operative (curative with surgery)
- Definitive (curative without surgery)
- Palliative (non-curative) or Other

What is the T (Tumor) stage, if applicable?

- T1
- T2
- T3
- T4
- Tx/Unknown
- N/A

What is the N (Node) stage, if applicable?

- N0 (cancer has not spread to lymph nodes)
- N1
- N2
- N3
- Nx/Unknown
- N/A

What is the M (Metastasis) stage?

- M0
- M1
- Mx/Unknown

Based on the latest clinical records, does the patient have distant metastatic disease (e.g. cancer has spread to the brain, lung, liver, bone and/or other site)?

- Yes
- No
- Unknown/Not Applicable

Has the patient previously received radiation therapy to the same or an immediately adjacent area?

- Yes
- No
- Unknown

Prostate Cancer

Select the cancer type:

- Adenocarcinoma
- Small Cell
- Other

Has the patient had a prostatectomy?

- Yes
- No

What is the T (Tumor) stage?

- T1
- T2a
- T2b
- T2c
- T3
- T4
- Small Cell/Other: T2
- Tx/Unknown

What is the N (Node) stage?

- N0 (cancer has not spread to lymph nodes)
- N1
- Small Cell/Other: N2
- Small Cell/Other: N3
- Nx/Unknown

What is the M (Metastasis) stage?

- M0
- M1
- Mx/Unknown

Based on the latest clinical records, does the patient have distant metastatic disease (e.g. cancer has spread to the brain, lung, liver, bone and/or other site)?

- Yes
- No
- Unknown/Not Applicable

(Continued on next page)

What is the PSA level?

- ≤ 10.0 ng/ml
- $10.0 < 20.0$ ng/ml
- ≥ 20.0 ng/ml
- N/A

What is the highest Gleason Score (range: 6-10)?

- 6
- 7
- 8
- 9
- 10
- Unknown/Not Applicable

What is the patient's risk group?

- Low Risk (PSA ≤ 10.0 , Gleason Score = 6, T1- T2a)
- Intermediate Risk (PSA $> 10.0 < 20.0$, Gleason = 7, T2b-T2c)
- High Risk (PSA ≥ 20.0 , Gleason = 8- 10, T3 or higher)
- N/A

What is the intent of therapy?

- Post-Operative/Adjuvant/Salvage
- Definitive/Initial Treatment
- Palliative (non-curative) or Other

Please select the treatment site:

- Prostate only
- Prostate + pelvic lymph nodes
- Prostate fossa/Prostate bed
- Prostate fossa/Prostate bed + pelvic lymph nodes

Has the patient previously received radiation therapy to the same or an immediately adjacent area?

- Yes
- No
- Unknown

(Continued on next page)

Does the patient have a history of inflammatory bowel disease, such as ulcerative colitis or Crohn's disease?

- Yes
- No
- Unknown/Not Applicable

Soft Tissue Sarcomas

What is the primary treatment site?

- Head and Neck
- Chest
- Abdomen
- Pelvis
- Extremity

What is the T (Tumor) stage?

- T1
- T2
- T3
- T4
- Tx/Unknown

What is the N (Node) stage?

- N0 (cancer has not spread to lymph nodes)
- N1
- N2
- N3
- Nx/Unknown

What is the M (Metastasis) stage?

- M0
- M1
- Mx/Unknown

Based on the latest clinical records, does the patient have distant metastatic disease (e.g. cancer has spread to the brain, lung, liver, bone and/or other site)?

- Yes
- No
- Unknown/Not Applicable

(Continued on next page)

What is the intent of therapy?

- Pre/Post-Operative (curative with surgery)
- Definitive (curative without surgery)
- Palliative (non-curative) or Other

Has the patient previously received radiation therapy to the same or an immediately adjacent area?

- Yes
- No
- Unknown

Secondary Metastatic Disease: Bone / Extra-Cranial / Other

What is the primary tumor type?

- Colorectal
- Non-small cell lung
- Melanoma
- Prostate
- Renal cell
- Sarcoma
- Breast
- Esophageal
- Head and neck
- Gastric
- Pancreas
- Hepatobiliary
- Small cell carcinoma
- Other

What is the patient's estimated life expectancy?

- <6 months
- ≥ 6 months
- Unknown

What is the treatment site?

- Bone
- Liver
- Bladder
- Lung
- Other

(Continued on next page)

Which of the following criteria, if any, does the patient meet for the treatment of bone metastasis? Note: If the extra-cranial treatment site is **not** bone, please select N/A.

- Radiation therapy will include treatment of a weight bearing bone, such as femur
- Radiation therapy will include treatment of a bone that has previously undergone surgical stabilization
- Radiation therapy will include treatment of spinal cord compression
- Patient does not meet any of above criteria
- N/A

Has the patient previously received radiation therapy to the same or an immediately adjacent area?

- Yes
- No
- Unknown

Secondary Metastatic Disease: Brain Metastasis

What is the requested treatment for brain metastasis?

- Whole brain (External Beam Radiation Therapy)
- Partial brain (Stereotactic Radiation Therapy: SRS/SBRT)

Has the patient received previous whole brain radiation therapy?

- Yes
- No

Has the patient received previous stereotactic radiation therapy (SRS/SBRT) for brain metastasis?

- Yes
- No

What is the patient's estimated life expectancy?

- <6 months
- ≥ 6 months
- Unknown

What is the patient's performance status?

- KPS score of $\geq 70\%$ or ECOG performance status of 0-2
- KPS score of $<70\%$ or ECOG performance status of >2 (limited self-care/disabled)
- Unknown

Does the patient have leptomeningeal disease (i.e. spread to cerebrospinal fluid CSF)?

- Yes
- No
- Unknown

(Continued on next page)

What is the primary tumor type?

- Colorectal
- Non-small cell lung cancer
- Melanoma
- Prostate
- Renal cell
- Sarcoma
- Breast
- Esophageal
- Head and neck
- Gastric
- Pancreas
- Hepatobiliary
- Small cell carcinoma
- Germ cell tumor
- Lymphoma
- Other

What is the status of the extra-cranial disease in the past two months?

- Stable
- Progression
- Unknown

How many metastatic brain lesions does the patient have?

- 1-5
- 6-10
- 11 or more
- Unknown

Secondary Metastatic Disease: Oligometastasis

What is the primary tumor type?

- Colorectal
- Non-small cell lung
- Melanoma
- Prostate
- Renal cell
- Sarcoma
- Breast
- Esophageal
- Head and neck
- Gastric
- Pancreas
- Hepatobiliary
- Small cell carcinoma
- Other

What is the patient's estimated life expectancy?

- <6 months
- ≥ 6 months
- Unknown

What is the patient's performance status?

- KPS score of $\geq 70\%$ or ECOG performance status of 0-2
- KPS score of $<70\%$ or ECOG performance status of >2
- Unknown

Has the patient received definitive (curative) treatment to the primary tumor?

- Yes
- No
- Unknown

Is the primary tumor controlled? Note: A controlled primary tumor is defined as at least 3 months since original tumor was treated definitively, with no progression at primary site.

- Yes
- No
- Unknown

(Continued on next page)

Does the patient have any of the following diagnoses?

- Pleural Effusion
- Leptomeningeal Disease
- Peritoneal Carcinomatosis
- None of the above/Unknown

Does the patient have a previous history of metastatic disease?

- Yes
- No
- Unknown

Has the patient received prior local therapy (such as SBRT/SRS, RFA, cryoablation, or surgery) for metastatic disease?

- Yes
- No
- Unknown

How many metastatic lesions does the patient have? Note: If the patient has a history of metastatic disease and has received prior local therapy, please include the previously treated lesions in the total lesion count.

- 1
- 2
- 3
- >3
- Unknown

What is the size of the largest lesion?

- ≤5 cm
- >5 cm
- Unknown

Has the patient previously received radiation therapy to the same or an immediately adjacent area?

- Yes
- No
- Unknown

Skin Cancer

What is the histology?

- Melanoma
- Squamous Cell Carcinoma
- Basal Cell Carcinoma
- Merkel Cell Carcinoma

What is the T (Tumor) stage?

- Tis (in Situ)
- T1
- T2
- T3
- T4
- Tx/Unknown

What is the N (Node) stage?

- N0 (cancer has not spread to lymph nodes)
- N1
- N2
- N3
- Nx/Unknown

What is the M (Metastasis) stage?

- M0
- M1
- Mx/Unknown

Based on the latest clinical records, does the patient have distant metastatic disease (e.g. cancer has spread to the brain, lung, liver, bone and/or other site)?

- Yes
- No
- Unknown/Not Applicable

What is the intent of therapy? QC: Intent

- Pre/Post-Operative (curative with surgery)
- Definitive (curative without surgery)
- Palliative (non-curative) or Other

(Continued on next page)

Has the patient previously received radiation therapy to the same or an immediately adjacent area?

- Yes
- No
- Unknown

Thoracic Cancers (Excluding Lung)

Select the tumor type:

- Mesothelioma
- Thymoma/Thymic Carcinoma
- Tracheal Cancer

What is the modified Masaoka staging of the thymoma/thymic carcinoma? Note: If the patient does **not** have thymoma/thymic carcinoma, please select N/A.

- 1
- 2
- 3
- 4A
- 4B
- N/A

What is the T (Tumor) stage?

- T1
- T2
- T3
- T4
- Tx/Unknown

What is the N (Node) stage?

- N0 (cancer has not spread to lymph nodes)
- N1
- N2
- N3
- Nx/Unknown

What is the M (Metastasis) stage?

- M0
- M1
- Mx/Unknown

(Continued on next page)

Radiation Oncology Clinical Worksheets

Based on the latest clinical records, does the patient have distant metastatic disease (e.g. cancer has spread to the brain, lung, liver, bone and/or other site)?

- Yes
- No
- Unknown/Not Applicable

What is the intent of therapy?

- Pre/Post-Operative (curative with surgery)
- Definitive (curative without surgery)
- Palliative (non-curative) or Other

Has the patient previously received radiation therapy to the same or an immediately adjacent area?

- Yes
- No
- Unknown

Upper Gastrointestinal Cancers (Including Esophagus, Pancreas, and Liver)

What is the primary cancer site?

- Esophagus (Including GE Junction)
- Stomach (Non-Lymphoma)
- Hepatobiliary
- Small Bowel
- Pancreas

What is the type of hepatobiliary cancer? Note: If the patient does **not** have hepatobiliary cancer, please select N/A.

- Hepatocellular Carcinoma
- Cholangiocarcinoma Intra-Hepatic
- Cholangiocarcinoma Extra-Hepatic
- Gall Bladder Cancer
- Hepatobiliary: Other
- N/A

What is the T (Tumor) stage?

- T1
- T2
- T3
- T4
- Tx/Unknown

What is the N (Node) stage?

- N0 (cancer has not spread to lymph nodes)
- N1
- N2
- N3
- Nx/Unknown

What is the M (Metastasis) stage?

- M0
- M1
- Mx/Unknown

(Continued on next page)

Radiation Oncology Clinical Worksheets

Based on the latest clinical records, does the patient have distant metastatic disease (e.g. cancer has spread to the brain, lung, liver, bone and/or other site)?

- Yes
- No
- Unknown/Not Applicable

What is the intent of therapy?

- Pre/Post-Operative (curative with surgery)
- Definitive/Unresectable (curative without surgery)
- Palliative (non-curative) or Other

Has the patient previously received radiation therapy to the same or an immediately adjacent area?

- Yes
- No
- Unknown
